ASSOCIATE DEGREE NURSING

Carterville, Illinois

JOHN A. LOGAN
COLLEGE

John A. Logan College does not discriminate on the basis of race,
religion, color, national origin, disability, age, or gender orientation.

ASSOCIATE DEGREE NURSING

The John A. Logan College Associate Degree Nursing Program is designed to provide career mobility for persons who have successfully completed a practical nursing program. This unique nursing program is designed to prepare the student for the practice of nursing as defined in the Illinois Nursing Act and meets the requirements for schools approved for associate degree nursing in Illinois. Upon satisfactory completion of the program, the student will be eligible to write the NCLEX-RN licensing examination.

Admission Requirements

1. Graduated from an approved high school or demonstrated equivalent competency (GED examination).
2. Graduated from a state-approved program of practical nursing.
3. Fulfill admission policies for John A. Logan College.
4. Complete a pre-entrance testing program.
5. Be an Illinois practical nurse licensee in good standing or be eligible for Illinois licensure.
6. Have at least 1 year of full-time nursing experience or the equivalent (strongly recommended).
7. Successfully complete the ADN pre-entrance exam.
8. Provide proof of sound health to practice nursing.

SELECTION PROCESS

After the last test date, the scores of all eligible candidates are ranked from highest to lowest, and the top candidates are notified. Preference is given to in-district candidates. Test scores are valid for two years.

OBJECTIVES

Upon completion of the ADN Program, the graduates will be able to do the following:

1. Communicate effectively with clients, patients, family, and members of the transdisciplinary health team.
2. Apply principles of Erickson's stages of growth and development.
3. Apply principles of Maslow's hierarchy of needs.
4. Utilize the nursing process to provide nursing care to patients with common health problems in selected health care settings.
5. Demonstrate the professional responsibility necessary to function safely in the graduate nurse role.
6. Utilize principles of nutrition in health and disease.
7. Utilize principles of pharmacology, with understanding of rationale, and administer medications safely.
8. Apply scientific principles as the foundation for nursing interventions.
9. Implement individualized nursing care according to the patient's cultural background.
