Other comments about computer labs:

A great contribution

A nice environment to Research and study very effectively.

A++

At times printed items looked horrible due to toner problems (C239?)

computer lab by math office does not print

computer lab is always very useful. I hope someday we can make copies there.

computer software does need improvement

computers need individually cleaned (towers).

could have more up to date programs & more variety of things like Microsoft Word.

did not use the lab

Didn't use the labs

Don't Use em

Don't use them = 2

Extension Center labs should be open on Fridays....and hours clearly posted & updated

Fridays year around

glad that printing is free

have not used

Hours need to longer and printers should not automatically print front and back: not all teachers will accept papers like that.

I am glad they have this.

I bring my laptop so I have not used the computer labs. Signal is kinda slow in some parts of bldg

I cannot comment on this section, as I have not used a computer lab here.

I did not know we had a lab we could just go into and use.

I don't know when its open.

I hate the digital mouse pads (tablets). It would be nice to have regular mouse as well. In order to get where you need to go you have to reposition the mouse several times.

I just wish there was a computer lab over in the D or G building somewhere.

I never use the computer labs.

I personally use the labs about 2 or 3 a week. I prefer to do my homework in there than anywhere else.

I use the computers in the library instead of those in the computer labs, so I have no way to accurately rate the services.

I use the library computers, when I am here in the a.m.

I wish the staff would be more willing to help you. I had used a flash drive for the 1st time and I needed help.

Improve wireless network PleasePleasePlease [triple underscore]

INTERNET is really down!

It has been difficult to go from a semester where we are allowed to print homework to a present lab where we cannot print @ all.

It would be nice if people who needed to work on actual homework had priority for the computers than the people on facebook all day.

It would be nice if there were more computer lab locations.

It's good just need more hours

I've never used the Labs

I've had problems with printing outlines formatted to my specifications. Microsoft Word was frustrating and the computer lab assistants could offer no help.

Just could have more hours & better seating

longer [double underscore] hours! [double underscore]

Love Free Printing

Maybe more open hours especially because students have night classes

More printers, bigger printers. Ones that print fast and make girls sigh would be great.

N/A = 2

Need better printers

needs more comfortable/quieter seats

Needs to be open later, especially during finals

never use them

Never Use.

Never used

Never used computer labs. I bring laptop.

Never used it. Used the labs in E-wing and would put 4 on all those.

nice

Nice, relaxing spot away from the Library.

None

Not accessible to night classes after 4:30 p.m.

One of the printers had big streaks of black all down the paper.

One of the workers in C238 is friendly.

other than the computers you need to make sure the printers are working

Paper tray should be checked.

Provide detail on the process of procedures in Test and Results on numerous pathogens and how they affect us the human body

Realtime captioning has a disadvantage due to computer programs

Rollers on printers need biweekly cleaning.

should have materials for students

sometimes signal was a little slow

sometimes the printers are out but not a big disadvantage

Sorry, I haven't used them yet.

Staff is always helpful and pleasant

stop loud music

Students need to know when taking a quizz or test on line the front and back rows will not throw you off also the Center rows do not always work when doing homework go figure!

The computer labs are fine. However, the wireless signal tend to get a bit unreliable in the mid morning/early afternoon.

The computer staff is very helpful and friendly

The internet is always quick, & free printing is very helpful

The labs are helpful

The people working could be nicer and more helpful.

The printers work some time

They are very quiet seem as you would get your work done.

They should be open when school opens - 8am is too late b/c some people have class that starts then, but may need computer access prior to that time.

*Too many student allowed to chat in labs, very disruptive
very helpful.*

very useful

Why doesn't it open at 7:45 or 8?!

Wish they'd be open at 7:45 for 8:00 AM classes

Wonderful people working the labs

Would be nice to get in before 8 am.

Would like access to scanner, and fax machine. Also more privacy in computer lab, spots too close.

Yes

You don't pay for printing, love it!

Give the VolNews more reality on the homepage

Great facilities great staff

hard to search for teachers

have a direct login

Have a link directly to specific pages

I believe it would be wonderful to have a single working website for online classes & communication. Choose between Blackboard or Moodle instead of both.

I do believe it's really helpful.

I don't like volmail half the time its layout is messed up.

I feel like you should make the website more appealing to on-coming students.

I find the website very user Friendly and easy to navigate.

I had my own email and the one that the college provides is NOT user Friendly, other than that, blackboard is nice

I like it how it is

I like the way it is set up.

I like the website

I really like the setup of the website

I think and college campus map online should be more detailed and easier to read.

I think it is great the way it is!

I think it's pretty good as of right NOW.

I think the curriculum guides could be easier to find

I think the website is easy to get around on.

I use website everyday

I would like to see things that pertain to students easier to access. instead of the news stories

I wouldn't change anything

I'm not sure how to fix it but the online catalog is difficult to browse online.

Improve user friendly options

It has good resources

It is easy to use.

It looks bad, hire a professional graphic designer

It needs simplified

It's already pretty good

it's good

It's great there's nothing to change.

Its hard to find instructor information. The college catalog will not always open on my computer. I'm sure its a setting thats messed up but can't find the specs listed anywhere.

it's hard to find the catalog

it's just kind of blah & doesn't stand out

It's not that user friendly. The search function is awful. Have to navigate for too many sub-menus to get anywhere.

It's just clunky

Keep up good work

Links shown better

Make frequently visited areas easier to reach with links on the home page (quick links) for ex. curriculum etc.

Make grades more accesable

Make highlighted segments for separate links, like Blackboard.

Make it easier to check grades, simplify overall layout

Make it easier to find out information on the restricted programs

make it easier to navigate and more user friendly

make things appealing to the eye on the website

Making finding teachers & email addresses easier

Making it more attractive and fun.

Making weblink easier to find. AKA transcripts.

math xl isnt useful at all to time consuming and to much homework per night

Maybe change up the look of it every now & then

More buttons with easier language to understand

more info

more informational!

More sleek professional look, easier to access curriculum & degree page

Okay

Pretty satisfied

Put weblink on main page. As well as Moodle & BlackBoard

Putting subject under groups - fine arts, humanities etc.

redesign!!

Spruce it up a bit! :) Make it more beautiful, put a picture of the campus at the top of the page or scrolling pictures of the campus under the news feed.

The degree worksheets need to be way more specific.

The online college catalog needs to be available at all times; there have been times when it wasn't.

The search engine should be faster & a lot needs to be updated semester to semester.

The search feature does NOT [underscore] work well. If you are trying to find teacher info, it doesn't find them.

The search feature needs to be improved.

The website could be more organized but overall it is satisfactory.

The website it good for me.

The website seems a little cluttered and it seems like its hard to find stuff on the student link. I would say try a little reorganization.

Things need to be more organized and accessible to all

Understanding what classes have to be taken, From which ones are optional...

update more often

Very difficult to get into and switch to another site within the website

very helpful

Work on getting moodle quicker and always accessible.

Other comments about the College website, online College catalog, and online degree worksheets/curriculum guides:

Compared to other College sites I've used, JALC's is by FAR the best.

courses required for set curriculum (.ex "to be done in 2 yrs take HUM 101 in Fall '12") need to be offered in Fall.

Enjoyed my self here

Finding degree course work, can be difficult

I got lost using the catalog.

I hope we can provide more information about transfer emailism.

I rarely go the website, If i have issues i go to my advisor

It gives alot of information.

The curriculum guide is fine but some staff, should have a better knowledge base of this guide, to help students.

The Moodle set up is very (underscore) user unfriendly. More classes need to be on blackboard.

The website is good for me.

This may be on their and i just have not used but a search box that will take me to proper page ie: Advisor/list of Advisors?

Very easy to use

I love it! It's very clean and quiet, and now I don't have to walk by the basketball players all the time.

I personally think all the lounge areas need to have the feel of the ones in the new wing.

The new wing is not yet fully set up, and seems like they cut a lot of corners. Seems like they didn't have enough money, and yet still decided to add an incomplete wing.

The split level confused me at first, but it was alright once I figured it out.
