

JOHN A. LOGAN COLLEGE

# AGRICULTURE DEGREES

John A. Logan College, a premier educational institution in Southern Illinois, is excited to offer the first on-campus agriculture degrees in the college's history. The agriculture industry is a leading sector of the economy in southern Illinois and continues to need a skilled workforce with degrees from both colleges and universities.

By choosing John A. Logan College, you will have access to a comprehensive agriculture and general studies curriculum over the next two years that will prepare you for either further studies in agriculture or direct employment in the industry.

*Current Degree Information and Curriculum:*

[www.jalc.edu](http://www.jalc.edu)

**A.A. in Agribusiness Economics** – A degree focused on preparing students for further studies or careers in the following areas: agribusiness, ag. economics, marketing, sales, finance and entrepreneurship. In addition to the agriculture course work, other classes will focus on economics, business principles and accounting.

**A.A. in Agriculture Education** – A degree focused to prepare student for further studies or careers as agricultural educators or in the field of agricultural communications. The foundations of education, educational psychology and agriculture will be studied to prepare students for careers as agriculture teachers/FFA advisors and agricultural communicators.

**A.A. in Animal Science** – A degree focused on the foundations of animal science and the agricultural industry. The degree will prepare students for transfer to a four year university for completion of an animal science degree.

**A.A. in Horticulture** – A degree that will provide opportunities for careers or advanced degrees in the production of horticultural crops, greenhouse and nursery management, garden center management and floral design.

**A.A. in Agricultural Mechanics** – A degree designed for students who will transfer to four-year institution for degrees involving the application, service, management, and marketing of agricultural engineering activities.

**A.A. Plant & Soil Science** – A degree focused on the study of crops and soils for careers or advanced degrees in crop production, crop protection, soil conservation and agricultural ecology.
