EDUCATION**
Career Connected Learning
for All Students

WELCOME

JALC is proud to support Career & Technical Education programs, students, faculty and staff through the Carl D. Perkins Grant. Currently, our Perkins program offers support to students who qualify by being enrolled in a CTE program or degree while meeting one of the nine qualifiers for overcoming barriers to education. In 2021, we are serving 30 students and assisting them in meeting their educational goals!

Career Connected Learning
for All Students

Career and Technical Education programs at John A. Logan College offer students an opportunity to work toward earning an industry-recognized credential or certificate at the postsecondary level, or an associate degree.

Through the Perkins Grant, a federal grant that supports students enrolled in Career and Technical Education programs, services for students such as assistance with books, uniforms, tool kit rentals and other resources are provided to qualified students.

CTE programs are skills-based courses of study that focus on preparing students to enter the workforce in high-demand fields.

To be eligible for Perkins assistance, you must be currently enrolled in a CTE program and meet one of the following nine criteria:

- Individual with a documented disability
- Individual from an economically disadvantaged family, including low-income youth and adults
- Individuals who are in non-traditional fields for their gender
- Single parents (including single pregnant women)
- Out-of-Workforce individuals
- Homeless individuals
- Youth who are in, or who have aged out of, the foster care system
- Youth with a parent who is a member of the armed forces who is on active duty

CTE is integral to preparing students for success. These programs ready our students for careers and college while helping our nation achieve economic success and workforce competitiveness, along with recognizing their accomplishments.
