As JALC faculty and staff, where do I go when I need to...

...find general information about the College including:
• Departments and Forms
• Program Guides and Course Descriptions
• College News and Events
• Hours and Contact Information
• Students Right to Know/Consumer Information
• Resources Offered by the College

...share and work together with other employees on internal projects?
SharePoint functions as the College's web-based intranet. This makes it possible for employees to work together and share information.
SharePoint is mainly an internal resource that only employees can view, there are a couple of exceptions to this rule.
• All current students can view the Syllabi Portal (but not the Syllabi Archive)
• Supervisors may request that specific student workers are given access to particular pages, lists or libraries, but only if such access is necessary to perform their job duties.

...access student information, and perform tasks such as:
• See Your Class List
• Enter Grades
• Advise Students
• Schedule a Room
• Run Reports Based on Data from our Jenzabar System

...access my hybrid (H), virtual/online (V), and face-to-face courses.
Desire2Learn allows John A. Logan College the ability to deliver an online enhanced learning experience for students in hybrid (H), virtual/online (V), and face-to-face courses. All faculty have the option to utilize D2L.

Trainings: D2L Orientation, ID Theft Prevention, Tutor Training, Orientation to Financial Services, etc.

Surveys: Student Trustee Election, D2L Student Survey, D2L Faculty Survey, etc.
