■ ROLE OF SHARED GOVERNANCE ■

The campus culture thrives in an environment of collaboration, transparency, and purposeful action. The practice of shared governance facilitates these goals by providing a space for conversations regarding policies, procedures, and the work of campuswide committees and task forces. Shared governance also ensures that decisions made reflect the perspectives, expertise, and best interests of all stakeholders.

Each constituency group at John A. Logan College is invited to participate in the Shared Governance Council (SGC) to play a role in reviewing submissions made through the Employee Comment Form and the Shared Governance Council Request Form. Collectively, SGC will determine a course of action for the submission.

SGC will also serve an advisory role to the President's Cabinet and as a repository for campuswide committees and taskforces as a means to prevent redundancy among work completed and actions taken at the College.

MEMBERSHIP

Membership to the SGC will be comprised of selected individuals from each of the College's employee groups and student representatives. A nomination process will determine the representatives for Senior Administrators, Administrators, Managers, Professionals, and Executive Support staff. Representation from the student body and campus bargaining units will be based on their own established processes. Should any additional employee groups be defined, a representative and an alternate will be added from those groups.

FUNCTIONS OF SHARED GOVERNANCE COUNCIL

- Facilitate transparency, communication, and accountability on campus.
- Act as the liaison for all constituency groups on campus.
- Prepare formal recommendations to the President's Cabinet to influence decision-making.
- Facilitate action on feedback received from the President's Cabinet.
- Maintain a repository of committee and task force work that affects the institution's direction and manage requests to create new committees and task forces.
- Report regularly to the Board of Trustees regarding outcomes achieved through SGC intervention.

BACKGROUND

As the College continues to provide needed training to its constituents, it is incumbent on the administration to establish guidelines under which these programs can operate efficiently and effectively. It is imperative that we offer high-quality programs with competent staff at a competitive cost. It is also essential that we develop a pool of highly qualified instructors. In order to do this, our rates of pay for this work must be attractive.

We must establish a philosophy and mission statement regarding training that is in keeping with the overall philosophy and mission statement of the College. This statement should set the overall parameters which will provide a basis for the program. All aspects of the program must be consistent with the statement of philosophy and mission.

In order to be effective, specific and measurable goals should be established for this effort in general, and for each program individually. These should be in writing established at the outset, and be a part of any agreement between clients and the College, and receive the same approvals as are given for other commitments, e.g., employment of staff, or expenditure of funds.

The responsibility of developing programs for training should fall primarily in the area of workforce development. However, all College personnel should assist with the initial stages of development by being familiar with programs being offered, and by being alert to the needs of the people and industries with which they come in contact. When a need is identified, the dean for workforce development and adult education and the dean for academic affairs will cooperate to coordinate and implement the program, utilizing the appropriate staff as needed.

Once a program is developed as to content, desired results, and basic approach, the College must seek the other essential ingredients--funding, staffing, and facilities--not necessarily in that order. If College facilities are to be used, we should be able to look to our policies regarding the use of College facilities for guidance. These policies set priorities and guidelines for the use of facilities, and establish the appropriate charges. Funding may be provided from a number of sources, and often will come from a combination of two or more sources. Whatever the case, these sources must be identified at the outset along with the stipulations that almost always go along with the use of outside funds. It will be necessary to involve the Business Office in order to establish an accounting structure, ascertain documentation and audit requirements, and billing procedures. Usually the best time to involve the Business Office is when the budget or cost estimate is being prepared.

Staffing, along with being the single most important ingredient contributing to the success or failure of any training program, will always require the most effort to accomplish. Staffing, as a function, includes not only the initial hiring but also the training, supervision, and evaluation of those people hired. Prior to hiring, it is essential that the terms of the employment be spelled out. What is to be done, how and for how much are the questions that must be answered.

Because these programs are unique and not repeated routinely, it will be impossible to establish hard and fast policies that will address precisely the responsibilities of each division of the College in carrying out this mission. It is important, however, that at least a framework be established that will aid in seeing to it that essential functions are accomplished and that necessary communication occurs--both horizontally and vertically within the organization.

PHILOSOPHY, MISSION AND GOALS

We would propose the following statement of Philosophy, Mission and Goals be adopted for training at the College.

A. Philosophy

John A. Logan College is dedicated to the concept that education is important for upgrading basic skills of area employees; for training in new technology; for retraining of unemployed workers; and for customized productivity training for business and industry leaders.

Within the financial limits of the College's ability to acquire grants and to maintain a solid financial base, it will endeavor to provide low-cost traditional and nontraditional educational opportunities whenever, wherever, and however they are needed to provide a productive work force for the region.

B. Mission

We are a diverse learning and teaching community committed to improving individual life and society through high-quality, accessible educational programs and engaged learning opportunities.

C. Goals

- to foster an environment where diverse individuals, groups, and views are valued;
- to provide programs and services for lifelong learning that create and enhance opportunities for achieving career and personal goals in a changing society;
- to serve with integrity and accountability as a model of institutional excellence;
- to offer affordable programs and services enhanced by technology in an accessible and safe learning and working environment; and
- to be a center for intellectual, economic, cultural, and recreational resources for individuals and communities.

ADMINISTRATIVE PROCEDURES

In order to allow the College to be labor market responsive, the following policy will be followed whenever programs of this nature are established. Authority is granted to the president to organize customized training programs as requested.

A. Initiating a Training Program

Once a need for a training program is established, the College contact person must complete a Training Proposal (see Appendix A) and obtain the necessary approvals prior to making any formal commitments.

B. Facilities

If College facilities are to be used, they should be scheduled through the Facility Scheduling Office. Fees for use of facilities will be established in accordance with College policy. (See Facilities Usage Board Policy No. 7210.)

C. Staffing--General

Faculty or staff selected to provide training must, first of all, be qualified to teach the programs offered. Second, it is important to involve as many of the College staff in these programs in order to develop a substantial pool of interested and qualified training staff. This will help insure that we can respond to a need quickly.

D. Staff Selection

Generally, the selection, training, and evaluation of faculty to teaching training programs will be handled by the workforce development and adult education department through normal College procedures. The workforce development and adult education office will coordinate the hiring process through the department chairs, the associate deans, the dean for academic affairs, and the human resources office in an effort to select qualified faculty who are interested in participating in the work force training program. In addition, personnel from business and industry and individuals from the general public will be actively recruited to supplement the pool of teachers available at John A. Logan College. John A. Logan College faculty participating in work force training programs on- or off-campus must teach on their own time.

E. Conflict of Interest

A full- or part-time employee of John A. Logan College will not provide training to an entity within the College district without the training being arranged by the College's workforce development office.

F. Staff Compensation

All personnel utilized to lead or conduct these programs will be compensated under a contractual service agreement. The president is authorized to approve fee schedules for customized training programs.

- (1) Compensation for on-campus grant training programs should be established at a range of \$14 to \$65 per hour. Prep time, if necessary, should be established at \$35 per hour for the first-time training is delivered. No preparatory compensation should be paid for subsequent training sessions covering the same subject matter. The amount of prep time necessary to teach the course will be determined by the workforce committee.
- (2) Compensation for off-campus grant training programs, which is primarily training for business and industry, should be established at \$14 to \$100 per classroom hour. The instructional fee includes consultation time, meetings, customizing, and necessary travel. Prep time should be established at \$35 per hour for the first time the training is delivered. Prep time will not be required for subsequent training programs covering the same subject matter. The amount of prep time necessary will be determined by the work force committee. Other grants may dictate the rate of pay in the grant. In such instances the rate established in the grant will take precedence.

- (3) Compensation for industrial training done through private contractual arrangement will be based on the fair market value. The fair market value is normally determined by the type of training, the amount of prep time, the availability of teachers, and the expertise required. In this area, the fair market value is normally \$100 per hour plus prep time. Prep time is situation dependent and will be determined by the workforce committee.
- (4) The total amount of extra compensation which one can earn from training programs for performing work outside of the regular job duties is limited to 20% of the employee's regular, monthly salary for each month.

FUNDING

Once the program is approved, a budget must be prepared showing sources of funding and projected expenditures. The Business Office should be involved in this process. It will determine documentation and audit requirements as well as obtain necessary billing information at that time.

It should be the goal of the training staff to price programs so as to include a 30% margin above direct cost for overhead on programs conducted on campus and 20% for overhead on programs not using College facilities. Consideration should also be given to charging additional fees for the use of computers or other technologies where unusual costs are incurred.

EVALUATION

The workforce development office will work with the instructor to develop an appropriate method of evaluating each training program. Results of evaluations will be reported to the deans, vice-presidents, president, and Board of Trustees, and maintained in College files for future reference. The basis for evaluation should be the goals that were established and written into the contract or grant proposal.

Exceptions to this policy and the following administrative procedures must have prior written approval of the President.

The Learning Resource Center will publish educational material and establish training to educate faculty and staff about the provisions of US copyright law and to provide more specific guidance for those seeking to use copyrighted material. Information will be published on copyrighted material already licensed by the College and on sources of non-copyrighted materials for educational use. However, it is the responsibility of the user to determine the copyright status of materials or works used.

There are three instances in which copyrighted works may be used when the copyright is held by a third party:

1. License the use of material (e.g., course packs);
2. Obtain permission from the copyright holder;
3. Use under the “Fair Use” Provision of Title 17, Section 107 of the United States Code

Whenever using copyrighted material, the best practice is to seek approval for use of the material or license the use of the work. Asking for permission often results in permission being granted without charge as long as the material is used within certain guidelines (i.e., distributed to a limited audience, used for a limited amount of time, etc.). Less preferable is to license the use of material through the appropriate market or clearing house. Print material, for example, has a robust market developed to license copyrighted works, and nearly all print material can be licensed through the Copyright Clearance Center (www.copyright.com). Student packs are also a preferred way of licensing copyrighted information for student use. The John A. Logan College Bookstore and other bookstores offer this service. Please Note: Licensing material through either of these two ways will always result in a fee being charged, whereas seeking permission through the copyright owner often results in free use within certain guidelines. That is why seeking permission through the copyright owner often results in free use within certain guidelines. That is why seeking permission directly from the copyright holder is the preferred method.

If a license for the work is required, it should be purchased or obtained through the appropriate College purchasing/requisition procedures or a course pack should be developed through an appropriate vendor. Permission should be granted by the copyright holder or clearance of licenses should be obtained prior to using or duplicating the copyrighted material. The Copy Center reserves the right to refuse to duplicate material without the appropriate clearances. Material refused by the Copy Center should not be duplicated on other John A. Logan College copiers nor on computer printers. Furthermore, appropriate approvals and licenses are also required before copyrighted material is used electronically on one of John A. Logan College’s learning management platforms.

The fallback position is to use the material under the “fair use” provision of the United States Code. One must keep in mind, however, there is no definitive line that can be drawn between “fair use” and infringement of copyright. The “fair use” provisions are not set in stone, but rather are a set of four guidelines that create a “balancing test” that must be applied to satisfy each fair use claim. The four factors to be considered, as defined in Title 17 of the United States Code, are:

1. The purpose and character of the use, including whether such use is of a commercial nature or is for nonprofit educational purposes;
2. The nature of the copyrighted work;
3. The amount and substantiality of the portion used in relation to the copyrighted work as a whole; and
4. The effect of the use upon the potential market for or value of the copyrighted work.

These four factors must be considered in each case where fair use is to be claimed. In addition to these factors, there are other considerations that must be considered. This is especially true of online usage of copyrighted material.

Other considerations when looking at fair use claims include the following:

1. Whether or not there is a method, or a market, for requesting or purchasing the right to use copyrighted materials;
2. Whether or not the ownership of copyright is easily determinable;
3. Timeliness;
4. The guidelines established by the conference on Fair Use (CONFU); and
5. The provisions enacted in the TEACH Act regarding fair use and distance learning.

When it is still unclear whether a work may be used under the “fair use” provision, it is best to obtain permission from the copyright holder.

Faculty and staff are encouraged to attend training sessions and learn more about copyright law in order to ensure legal use of copyrighted materials.
